**Children Need  
the VITAMINES in  
WAMPOLE'S EXTRACT OF COD LIVER**

Vitamines—that mysterious  
"something" which makes the  
young grow—will be found in  
Wampole's Extract of Cod  
Liver, as well as other ele-  
ments necessary for the de-  
velopment of health and strength.

Children who seem to be at a  
standstill—lacking in energy  
or vitality—and convalescents  
who do not improve readily,  
get just the needed tonic stim-  
ulant effect from a short treat-  
ment with Wampole's Extract  
of Cod Liver.

Price \$1.00 per bottle

STATIONER**

Wheat Pool Notes

The new Alberta Wheat Pool  
terminal will be taken over by  
the Alberta Pool Elevators organ-  
ization sometime during the latter  
part of this month. The new

terminal which has a capacity of  
two and one-half million bushels,  
is the largest and most modern  
elevator on the coast. There  
will be no ceremony in connection  
with the opening of this new

## LOCAL ITEMS

Mr. Hurley returned from  
Saskatoon on Saturday.

Mr. W. Mart recently purchas-  
ed a new Ford Roadster.

Born—To Mr. and Mrs. Say-  
ers, on Monday, a daughter.

Chas. Milligan left for his home  
in Harrisville, Mich., Wednesday.

A. R. Osterberg purchased a  
Graham Truck from Cooley Bros.  
this week.

You're bound to like it. Rich-  
ard Dix' new drama—Shanghai  
Bound.

We are glad to report that Mrs.  
Warren returned from the Cerebral  
hospital on Thursday.

Mr. and Mrs. Elliott returned  
after spending a two weeks vaca-  
tion at Edmonton.

Mrs. McBane of Calgary visit-  
ed at the home of Mr. and Mrs.  
Milligan on Wednesday.

Mrs. Audel (nee Alma Codell)  
and son, of Craigville, are visiting  
with the former's brothers.

Heath's traveller will be at  
Hurley's with ladies' coats and  
dresses on Wednesday, Sept. 26.

Modern China is the back-  
ground of Richard Dix' most ac-  
tional drama! Shanghai  
Bound.

We are sorry to hear that  
Clarence Peterson underwent an  
operation for appendicitis. His  
many friends wish him a speedy  
recovery.

John Howton celebrated his  
13th birthday anniversary on  
Tuesday evening, Sept. 18th.  
There were ten guests present  
and all report an excellent time.

John F. Miller, Sight Special-  
ist, of Calgary, Alta., will visit  
Chinook on Friday, Sept. 21st.  
Get your children ready for  
school and come early. Advt.

Mr. W. Hughes has installed a  
new Holmes Motion Picture Pro-  
jecting Machine at the school  
hall. He promises better pictures  
than ever with this new machine.

The Ladies Card Club met at  
the home of Mrs. Robinson on  
Tuesday evening last. The hon-  
ors of the evening went to Mr.  
Hurley. Last week the Club  
met at the home of Mrs. Dawson,  
the prize being won by Mrs.  
Massey. Mrs. Steckle will en-  
ertain the Club next Tuesday  
evening at the home of Mrs.  
Hurley.

East is East and West is West  
but—when the twain do meet  
Richard Dix proves himself a  
hero by outwitting a horde of  
raving Chinese pirates. That's  
just one of the thrills in Para-  
mount's ultra-modern drama—  
Shanghai Bound.

## A SCOURGE OF CHILDREN

During the months from May  
to November there is a "terror"  
that walks by night, a whisper  
of whose presence makes parents  
tremble. This dreaded thing is  
Acute Poliomyelitis—Infantile  
Paralysis.

Infantile Paralysis is a germ  
disease. It occurs most often in  
the months May to November,  
and most often among children,  
though adults are not by any  
means immune. The disease  
affects all races, all classes, and  
all parts of the world, but is more  
prevalent in colder climates. The  
robust child falls a victim as read-  
ily as the delicate child.

During an epidemic rural com-  
munities suffer more than cities.  
Infantile Paralysis in its begin-  
ning resembles many other con-  
tagious diseases. A child that  
has been perfectly well will be-  
come restless and drowsy. He is  
irritable and does not want to be

## Wedding Bells

Of interest to a large circle of  
friends was the marriage of  
Thelma Anna McCall, R. N.,  
eldest daughter of Mr. and Mrs.  
J. A. McCall, of Youngstown,  
Alta., and Ralph B. Wilson, el-  
dest son of Mr. and Mrs. Amos  
Wilson, 224 Twelfth avenue west,  
which was solemnized at the  
home of the groom's parents, at  
3 p.m. Saturday, the Rev. Capt.  
Munaster officiating. Only im-  
mediate friends were present at  
the ceremony.

The bride, who was given in  
marriage by her father, wore an  
imported model of sand crepe  
romaine, heavily embroidered,  
with two-tone French model hat,  
and carried a lovely bouquet of  
Madame Butterfly roses. She  
was attended by Mrs. J. Riley,  
who wore a frock of blue crepe,  
with sand colored hat. Mr. Riley  
attended the groom.

Following the ceremony a re-  
ception was held, when the guests  
were received by Mrs. J. A. Mc-  
Call and Mrs. A. Wilson. The  
groom's mother wore a gown of  
black georgette, while the bride's  
mother chose a model of cut  
velvet.

Later the bride and groom left  
for the coast, where the honey-  
moon will be spent. Upon their  
return Mr. and Mrs. Wilson will  
make their home at 11 Aberdeen  
apartments.

Mr. Wilson is sporting editor  
of the Herald.

There may be vomiting  
diarrhoea, but constipation is the  
rule. There may be headaches,  
pains in the muscles, or a convul-  
sion. The child is feverish.  
That may be all that appears, yet  
within one or two days the child  
may be unable to move arms or  
legs.

If a child appears to have fever  
vomiting and marked restlessness  
put him to bed, and call a doctor  
promptly. No matter how mild  
the sickness may seem, get a doc-  
tor. While waiting, give a dose  
of Castor Oil. Keep all other  
children away.

If there is an epidemic, keep  
your children away from crowds,  
movies, theatres, dances, etc.  
Keep them from homes where  
there is sickness. Keep the house  
clean, using plenty of soap and  
water. Burn rubbish. Garbage  
buckets should be tightly covered,  
and cleaned daily. Keep out  
flies and other insects. Let in  
fresh air and sunlight—they are  
Nature's killer of germs.

Further information may be  
had from Canadian Red Cross  
Society, 407 Civic Block, Edmon-  
ton.

## Christianity's Next Task

The signing of (1), the Treaty of Versailles in which is incorporated the covenant of the League of Nations; (2), the naval treaties at Washington; and (3), the Kellogg anti-war declaration recently at Paris, were all hailed by press, pulpit and public as important milestones along the road to permanent world peace and a better understanding among the races of the earth. Special services were held in churches to mark some if not all of these events, while thousands of columns of editorial matter were printed lauding these notable efforts to put an end to racial animosities. And every word written or spoken in praise and support of these great peace movements was fully deserved.

But, notes the Literary Digest, the new programme for world-wide spiritual co-operation adopted by the International Missionary Council at its last meeting in Jerusalem may be considered as revolutionary in the ecclesiastical world as the above named three events are in the political world. All look to the promotion of peace, but the Jerusalem Conference, perhaps, probed deeper into the problems which agitate the world and array nation against nation, race against race, and concludes the Literary Digest, while little publicity has been given to the deliberations and conclusions of the Conference held on the Mount of Olives, no bells rung or psalms of praise offered up, yet so much was done that posterity may rank Jerusalem with Geneva, Washington and Paris in the onward march of mankind toward international unity and the ending of racial hatred.

Among the subjects discussed on the sacred mount outside the Holy City were the race problem, the rights of minorities, the protection of women and children in industry, relations between strong and weak nations, the land question, intellectual and spiritual co-operation, relations between church and state, and various other phases of world peace. Specialists on race, industry, and international relations from the minorities section of the League of Nations and the Universities of London, Harvard and Columbia, among other institutions, were present to contribute technical knowledge as these problems were attacked.

And with what result? Following lengthy and searching study of conditions as they now exist in countries all over the world, and the relation and duty of the Christian church thereto, this International Missionary Conference meeting at Jerusalem found that "the Church has not firmly and effectively set its face against race hatred, race envy, race contempt, or against racial, national and social pride, or against the lust for wealth and exploitation of the poor by the rich."

It was evident right at the beginning of the Conference that the old attitude of superiority of the West over the East, regarding of Nordic civilization and the Christian religions as one and the same, was not acceptable. The idea of race superiority was not admitted for a moment, and the Conference indicated its belief that the basis of race prejudice is economic. In lands where races live side by side, participation by all in racial intermingling for social, cultural, and religious fellowship was declared to be the natural expression of Christianity, and was welcomed as a step toward world-wide understanding.

Who is there will deny that such belief and conclusions are in line with the teachings and spirit of the Founder of Christianity?

And does there not emanate from this Conference a special message for the people of Canada, and especially for the people of Western Canada? Of late there have been unfortunate revivals of ancient campaigns by certain classes of our people against other classes based solely on questions of race and creed. Most unfortunate of all is the fact that many of the leaders in these campaigns, which are a denial of Christ's whole life and teaching, are recognized leaders in the Christian church.

It is the fond hope and dearest ambition of many thousands of forward-looking, patriotic Canadians that this young Dominion reaching out in its new nationhood will become a power for good in the world; that its greatness will be found not alone in its wealth of natural resources, its far-reaching trade and commerce, its culture, but in those spiritual attainments and contributions to all mankind which, in the final analysis, are the true measures by which to estimate the greatness of any people or nation.

### Good Job For Him

He was the slowest boy on earth, and finally he was apprenticed to a naturalist. He was so slow it took him an hour to feed the canary, two to stick pins through four butterflies, and after taking all afternoon to change the goldfishes' water, he asked what else he could do. "Well," said his master, "you might take the tortoise for a run."

### Forest Fire Costs

Canada's bill for forest fire losses amounts to more than \$150 a week for every man, woman, and child of the population. Federal and Provincial Governments, are putting forth efforts to reduce and eventually wipe out this heavy loss.

The longest railway run from Riga to Vladivostok, 6,800 miles.

### Prosperity In Central B.C.

D. D. Munro, provincial government land settlement agent, Smithers, reports that crop prospects for Central British Columbia this year are very good. He states that since the erection and operation of the grain elevator at Prince Rupert, a number of farmers are going in for grain growing with splendid results. He also says that the increase in mining is having a very beneficial effect, and he is enthusiastic with respect to the future prospects of that territory.

During a spell of cold weather the Aberdonians were to be seen going about with their mouths open. There was a nip in the air.

The first geological period, called the azoic, contained no trace of life in any form.

### Tourist Trade Increasing

Figures For 1928 Will No Doubt Show Gain Over Last Year

While it was estimated that American tourists spent \$200,000,000 in Canada last year, there is no doubt but that figures for 1928 will show fresh gains, stated R. K. Odell, assistant director of the natural resources intelligence service of the department of interior, who was in Edmonton in connection with affairs of his department.

Development of the tourist trade is of extreme importance to Canada and its value is fully recognized, said Mr. Odell. In carrying on its work, the federal branch is co-operating with the provincial governments and other local bodies.

### ARE YOU RUN-DOWN?

All That Is Needed Is a Tonic To Build Up the Blood.

There are many people who have been semi-invalids so long that they accept their condition as a life burden. They have endured nervousness, broken sleep and a generally run-down feeling so long that they have given up hope of again enjoying good health. In most of these cases a well known diet, fresh air and a tonic to build up the blood would do wonders. And as a blood-building tonic no other medicine can compare with Dr. Williams' Pink Pills. That is, there is scarcely a spot in Canada where you will not find some formerly ailing person who has found new health through the use of this medicine. The experience of Mrs. Thomas Ahearn, St. Malo, Que., bears out these statements. She says: "I have the greatest reason to be thankful for what Dr. Williams' Pink Pills have done for me. I was in a very weak and run-down condition. Frequently I would faint and my legs would swell badly. It was almost impossible to do any housework. It seemed as if my blood had turned to water. In this weak and despondent condition I began taking Dr. Williams' Pink Pills. A few boxes proved that they were helping me, but I continued taking the pills until I had used a dozen boxes, by which time I found myself a completely restored woman, able to do my work without fatigue, a better appetite and a sense of cheerfulness, where before I had been despondent. For all this, thanks to the health-giving qualities of Dr. Williams' Pink Pills. If you are feeling run-down, give Dr. Williams' Pink Pills a fair trial and new health will be yours. You can get the pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

### Important Fossil Beds

The Red Deer Valley of Alberta is exceedingly rich in fossil remains of dinosaurs and other extinct vertebrate animals, which are being slowly exposed by erosion of the sides of the valley. It is the most productive collecting field in Canada and has already yielded much new and well preserved material to the museums at Ottawa, Toronto, Edmonton, and New York.

Ashtoria Is Torture. No one who hasn't gasped for breath, in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

### Many Occurrences Of Salt

Salt, either in natural brines or in beds of rock salt, is found in every province of Canada. Commercial production, however, is confined to Ontario, Nova Scotia, and Alberta.

It Will Prevent Ulcerated Throat. At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

### A Forlorn Hope

At the grave of the departed, the old darky pastor stood, hat in hand. Looking into the abyss, he delivered the funeral oration.

"Samuel Johnson," he said, sorrowfully, "you is gone, An' we hope you has gone where we 'specks you ain't."

Canada's Experimental Farms The Dominion Experimental Farms system of the Department of Agriculture stretches across Canada from the Atlantic to the Pacific, and is the most comprehensive system of its kind to be found in the world.

A scientist says women are going to become the ruling sex. That's the worst of these scientists! They go to sleep for so long between their discoveries, that when they awake and speak, "it's all over long ago."

Minard's Liniment cleanses cuts, etc.

W. N. U. 1751

### Smart One-Piece Dress

The inset plaited sections topped by patch pockets adds to the trimness of interesting one-piece dress with new neckline. It's just the dress you need for sports and general utility wear. It is very effective in printed linen with shaped bands at neckline, inset vester and belt. Silk pique, men's silk shirting fabric, silk broadcloth, plain linen, washable rayon silk, washable flat silk crepe, wool jersey, printed silk crepe, crepe satin and sheer woolsens, also appropriate for sports in town or country. Style No. 240 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 2 1/2 yards of 40-inch material with 2 1/2 yard of 36-inch contrasting. Pattern price 25 cents in stamps or coin (coin preferred).

We suggest enclosing 10 cents additional for a copy of our Fashion Magazine.

## Here's How

## You Can Always Keep Your Farm Buildings in Good Repair

### GYPROC Advantages for Farm Buildings

Easy to use.

Low cost.

Workable as lumber.

Can be used for

crack, shrink or burn.

Takes any decoration.

Resists heat and cold.

Vermin proof.

Does not require

paints or stains.

Protects your stock

from flies, mosquitoes,

lice, poultry houses,

and other farm buildings.

Especially suitable

for covering attics and

basements into extra

rooms.

THOUSANDS of farmers have learned how easy and economical it is to keep farms up-to-date with Gyproc. Whenever repairs or alterations are required—whenever new buildings are needed—they rely on this famous fireproof wallboard.

For fast, economical, fireproof construction there is nothing to equal Gyproc. It cannot warp, crack, shrink, bulge or burn. Its million-celled rock insulation protects stock from cold, heat and vermin. Saves time, saves labor, saves fuel—the easiest to erect and most satisfactory Wallboard you can buy.

### Recipes For This Week

(By Betty Darley)

### PORTO RICAN ROAST

2 pounds round of beef.

1 small bottle stuffed olives.

1/2 pound salt pork.

1 onion.

2 teaspoons salt.

1 pint canned tomatoes.

1/2 pint boiling water.

Make small slits or holes in the meat with a sharp knife on each side of the roast. Cut the salt pork in small strips an inch long and stuff the holes alternately with these and with stuffed olives. Fry out the salt pork in a heavy kettle, slice the onion, fry it in this, then remove all bits of onion and salt pork, brown the roast on all sides, and add one-half pint boiling water and the tomatoes. Season when half done. Simmer for three hours.

## Youths From Britain Are Returning Home With A New Vision of this Dominion

Coming here a month ago for a tour of Canada as "ambassadors of empire," fifty representatives of the youth of the British Isles, 25 boys and 25 girls, between the ages of 14 and 21, are returning to their homes in England, Ireland, Scotland and Wales, as real ambassadors for Canada.

Their captivation by the charms and challenges of the Dominion, and their intention to boost Canada on their return home, were declared at a luncheon tendered the party by the city of Montreal.

"We," said Lady Marjoria Dalrymple, in charge of the 25 girls in the party, "will tell of the wonders we have seen and the practical splendor of Canada, the warmth of Canada's welcome and hospitality, and the warmth of feeling toward us of the Old Land. We go back full of great memories and high ambitions. We can all do our bit. I believe that if people come out here with open minds and a willingness to work, they will be helped."

Kenneth Lindsay, M.A., Oxon, in charge of the 25 boys of the party, said: "We are going back to set up fifty individual selling agencies for Canada. We go back with hopes high and confirmed optimists. We go back with a new vision of Canada."

"We recognize this is a land of milk and honey—but not for those who are not prepared to work," went on Mr. Lasot. "We are going home to preach the gospel that you want here workers and not shirkers."

"We are not concerned about the 'peaceful penetration of the United States' in this country. We find on all sides a very great and sincere love for the empire and we feel this scheme has played a contributory part in that unity of empire which is one of the most potent influences in the preservation of the peace of the world."

"We came to Canada seeking the soul of Canada. We have seen something of the real Canada. We have visited typical Canadian homesteads; we saw the wheat fields, even have had a small part in gathering the harvest; we have visited typical city homes; we have seen your gold and other mines at work; we have climbed your mountains; we have sailed your lakes; we have seen something of your vast industries and we have seen a great deal of your vast natural resources. And we go back home with a real knowledge of the progress of Canada. We feel that the thing of importance is your future." Mayor Houde suggested Canada adopt a similar scheme, sending a group of Canadian youths to the British Isles on a return visit to this one. The idea was praised by Mr. Lasot, who promised full co-operation from the other side if the idea was put into practice.

**Chief Of Tobacco Division**  
Nels T. Nelson, B.S.A., has been appointed chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A., and previously had several years' experience in tobacco culture. The rapid increase in tobacco production in Canada, which has increased from 13,000,000 pounds in 1921, to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

**Western Cedar Poles**  
Recent tests at the Department of the Interior's Forest Products Laboratories, Vancouver branch, show that western cedar poles from fire-killed timber have practically the same strength as those obtained from green trees.

Woman may be a conundrum, but she always has a ready answer.

"Call me at six in the morning."  
"There will be no need to call you."  
"How do you know that? What will wake me up?"  
"Just go to bed and you will see."  
—Fleegende Blaetter, Munich.

## Writer Interested In Canadian Home Life

**British Woman Journalist Making Trip Through Dominion**

Very few visitors to Canada are impressed with the luxuries of the Dominion, but that is just what strikes Miss Daisy Cryar, London journalist. Unlike most journalists who visit the Dominion it is not the nation's problems—or its wheat crops which interests her most. She will write of how Canadian women live and describe modern Canadian homes.

The women of the leisure class in England have no idea of conditions as they exist in Canada, according to Miss Cryar. "I am not referring to business women, but women of leisure. They think this is a terrible country and feel sorry for women, who have to live here. They have no idea of the luxuries which are enjoyed here," Miss Cryar declared.

Canadian plumbing was one thing which caught the attention of the British journalist. Your taps are so big. You turn on one and a whole Niagara of hot water comes gushing forth. Then you seem to indulge yourselves. You keep your homes warm, while in England we still depend largely on fireplaces which mean only a small portion of the house is hot."

Miss Cryar writes for the London Daily Mail under the pen name of "Nan Clouster." Following her trip to Canada, which is partly a holiday, she plans to go to Paris from where she is writing a series of articles for the London Daily News and London Daily Mail.

## B.C. Poultry Industry

Murdo Smith is establishing a large poultry business in connection with his farm at Terrace, B.C. Last month he added 500 high class laying pullets, purchased from the provincial industry henery, to his already big flock.

W. N. TILLEY, K.C.  
Director, Canadian Pacific Railway

W. N. Tilley, K.C., is one of the leaders of the Canadian Bar. He has specialized in railway legal work and has been actively engaged as counsel in all of the larger railroad questions in Canada since 1914.

Mr. Tilley's connection with the Canadian Pacific began about ten years ago, when he became special counsel for the company, handling all their important appeals and acting as counsel in various rare enquiries.

Mr. Tilley's wide experience in constitutional railway and corporation cases has resulted in his being retained both in the Canadian courts and Privy Council in most of the important issues of the past ten or twelve years, his first outstanding case being the International Fisheries Arbitration at the Hague, where he appeared as one of the counsel for the Dominion of Canada and Newfoundland.

Mr. Tilley was born at Bowmanville, Ontario, in 1868, the son of the late Dr. W. E. Tilley, inspector of public and high schools. He was called to the Bar in 1894, and was gold medalist in his final year in law at Osgoode. He was created a K.C. in 1916.

**Canada's Platinum Production**  
Canada is the third largest producer of platinum among the countries of the world, Russia and Colombia, South America, holding first and second place respectively. Last year Canada produced 11,228 fine ounces of platinum valued at \$717,613.

A young woman was being cross-examined in court.  
"How old are you?" interposed the magistrate.  
She hesitated.  
"Don't hesitate," said the other: "every second makes it worse."

## MOTHER OF FAMOUS RUNNER

Mrs. Charlotte Williams, of Vancouver, was in Montreal to meet her son, the sprinting sensation of the Olympic games, who says she is "the proudest and happiest mother in Canada." "Really I never thought Percy was the best of the runners. I felt sure that it would be some American or European who would win. But I had ever so much confidence. I knew he would do well, but he did better than I thought." Montreal reporters were amazed when they met Mrs. Williams, who looked so young and is so pretty. They thought at first she must be Percy's sweetheart. She is sure he won't go to university in the United States, but will attend the University of British Columbia.

## Following Regular Course

**Nothing the Matter With Gulf Stream Say Old Mariners**

Two mariners from across the Atlantic have brought word to New York that, contrary to report, the gulf stream is following its regular course.

Some trans-Atlantic shippers had expressed the belief that the warming stream was shifting away from the British Isles, but this was disputed by Captain S. G. S. McNeil, of the Cunarder "Mauretania," and Captain Johnsen, of the Columbus of the North German Lloyd.

"There has been no change in the course of the gulf stream," said Captain McNeil. "It has been running rather stronger this summer, and this has caused the counter current westward from the northern edge to run a little faster."

"There are a number of people who have been crossing this ocean for twenty to thirty years and don't appear to be aware of the existence of the counter current. There is nothing wrong with the gulf stream."

Captain Johnsen said he has noted no change in the course of the stream. He suggested that for accurate scientific purposes slow moving ships be sent cross-cross over the range of the stream to establish authoritatively just what it is doing. Fast-moving ships are impracticable.

## A Land Of Homes And Plenty

**Comfort and Sound Life Of The People Of The Prairies**

"The greatness of this new prairie land—Manitoba, Saskatchewan, and Alberta—is not only in its growing crops but in the comfort and sound life of the country people scattered all over its territory. It is a land of homes and plenty. If its people have to work hard, they find time also for sport and pleasure. Almost every family has its motor car. Every farm house has its wireless, and nearly everyone keeps in touch with neighbors and the world by telephone. The prairies have long been trying to develop a new summer route through Hudson Bay, which will save all the long journey across land from Montreal and will hasten the day when these great cities (Winnipeg, Edmonton, Calgary, Saskatoon, and Regina) will be more and more the astonishment of the West—My Magazine, London, Eng.

Geologists think England is tilting. They say that while the north and west are slowly rising, the south and east are sinking.

King Alfonso of Spain makes a hobby of medicine and is greatly interested in surgical operations.

## Removal Of Fear Of War Greatest Factor In Development Of North American Countries

### Splendid Feed For Stock

**Soybean Makes Heavy Hay Like Clover But Needs Thorough Curing**

The soybean, a crop well known in some parts of the United States and commencing to get a foothold in Canada, makes a very good class of hay. Officers of the Experimental Farms Division of the Department of Agriculture have written a pamphlet on Soybeans in Canada, that gives one a very good idea of the usefulness of the crop. The soybean, like clover, makes a heavy hay that is relished by live stock. It is ready for harvesting any time after the pods have developed until the leaves begin to turn yellow. G. P. McRostie, the head of the Forage Crops Division, says that the best time to cut is when the pods are well filled, for at this stage the highest yield and best quality is obtained. After being cut with the ordinary hay mower, it is left in the swath for about a day or until the leaves are thoroughly wilted. The practice in this respect is about the same as with clover. When wilted it is raked into windrows where it is allowed to cure. After two or three days, if the weather has been favorable, it should be put into small cocks for further curing and drying. Thorough curing is needed to prevent spoiling in the mow. The hauling and handling requires to be carefully done in order to preserve the leaves, which are the most valuable part of the feed, as much as possible.

### Danger From Snakes

**Experience With A Deadly Cobra In South Africa**

One day my mother was horrified to see, through a window, her baby in this open space playing with a huge cobra. The little child was sitting in front of the snake pointing with its finger at the quivering tongue of the snake; the snake had reared its head, and was hissing at the child, with its head close to the child's face. It was a critical time; if the snake was in any way startled, or angered, it would strike at once, and the child would be dead in a few minutes. What was the best thing to do to rescue the child? My mother did the very best thing she could have done under the circumstances. She took up a mouth organ which was near her, and played soft music on it. This attracted the attention of the snake, and for a moment it left the child, and then, still playing, my mother approached the baby; the snake crawled away, and the child was brought to the house. Gentleness was the only way in which the child could have been saved.

It is wonderful how many people escape death in a country so full of snakes. As I am writing this, the papers tell how a boy put his hand into a hole in a wall to rob a bird's nest, but the snake had been before him, and was still in the nest, and when the child's hand reached the place where the bird's eggs should have been, it touched the snake, which struck, and the child was dead in a few minutes.—Dr. S. P. Impey, in South Africa Cape Times.

### Explore Barren Lands

**Airplane Survey Finds Northern Tundra To Be Sixty Per Cent. Lakes**

The "barren lands" of the far north were explored recently by a party of three men in a super-Universal Boker monoplane of the Western Canada Airways. The four-thousand-mile journey took twelve days.

The route taken was from Winnipeg north to Churchill and Chesterfield Inlet, across the Baker Lake barren lands to Fort Smith, Wallace Lake, Reindeer Lake, Cold Lake, and return to Winnipeg.

The trip revealed that so-called barren land territory is composed of sixty per cent. lakes, the explorers stated, and the remainder is barren rock and tangled vegetation.

Not a sign of life could be seen as the plane winged from Chesterfield Inlet nearly 1,500 miles north to Baker Lake, at which point a few trappers, priests and Eskimoes live the year round.

Less sole leather is produced annually in Africa than in any other continent and in 1927 the total production amounted to only 17,600,000 pounds.

"What are the seven ages of woman?"

"Her real age and six guesses."

Renunciation of war is symbolized by the Canadian-American border, says the Washington Post, in an editorial commenting on Premier MacKenzie King's speech, at Geneva.

"All the arguments for peace find support, all the objections to the world peace treaty are reduced to unconvincing postulate, by the relations which have existed between the two countries for more than a hundred years. The old Rush-Bagot treaty has amply sufficed for the ends of amity. The international joint commission is the agency for the settlement of the ends at issue, and it always finds support for its judgments."

The Post comments that the "most quickening thought" said by the Canadian Premier, at Geneva, was his conclusion that the removal of the fear of war had been the greatest factor in the development and prosperity of the North American countries, and adds: "The growing world opposition to war cannot now lose sight of the advantage enjoyed by the neighbor countries of North America through the removal of fear of war. Canadian-American peace, has been maintained in the face of wars that have time and again altered the face of Europe. This is an old story to Americans and Canadians, but it had a strange sound to many of the representatives of the war-weary states. The psychology of peace, which has been the basis of permanent good-will between Canada and the United States and which has conducted to bringing prosperity, can be obtained by all nations, if they will make a habit of renouncing war. This will remove the fear of war, and with fear eliminated, armaments can be reduced and abolished."

## The Control Of Pests

**Measures To Be Taken To Overcome Pests In Field And Garden**

The greatest menace to agriculture is the large number of insect pests, which with very little encouragement spread at an alarming rate. These are particularly prevalent and persistent in gardens and unless control measures are instituted soon make crops of vegetables and flowers a total loss.

Injurious insects may be divided, roughly into two classes, by the nature of their mouth parts, "biting" insects which bite and chew their food, such as cut worms, leaf eating beetles, etc., and "sucking" insects which suck up their food by means of their beaks, such as aphids, the tree bugs, the scale insects, etc. For the first a stomach poison is necessary and for the second a contact insecticide.

"Insects of the Flower Garden and Their Control," is a new bulletin of the Department of Agriculture, No. 99, new series. This may be had on application to the Publications Branch, Department of Agriculture, Ottawa, and it will be found a very full treatise on the cultural practices for the control of insects, also the formulae for insecticides and the way to apply them. Arthur Gibson, Dominion Entomologist, has covered the control of destructive insects in a very full and complete manner in this bulletin, and the work is fully illustrated.

### The Mighty Hunter

Big Hunter (at club at 2 a.m.): Yes, sir, I've beaten the lion in his den; faced tigers—

Waiter (interrupting): You're wanted at the phone, sir. Your wife wants you to come home.

B. H.: I say, waiter, here's half-dollar for you. Just tell her I'm not at the club.

The average production of honey per hive in Cyril T. Duncliffe's apiary at Minotons, Swain River Valley, Manitoba, during the past four seasons was 125 pounds.

He who lacks time to make lacks time to mend.

"Now that you have learned how to stop, you must buy a new car to learn how to turn."—Pele Mele, Paris.

The oftener you look back, the faster you don't go.

## CRITICIZES MOVE TO BRING JOBLESS FROM BRITAIN

Toronto. — Immigration problems formed the chief subject of discussion at a session of the Trades and Labor Congress of Canada. While there were few aspects of the immigration policy left untouched, the highlights of the session were the unqualified denunciation of the British mine-harvester movement and an address by Hon. Peter Heenan, in which the Minister of Labor dealt forcefully with the immigration question.

Mr. Heenan charged that there was a well-thought out campaign being conducted in Great Britain to stampede the Dominion government into bringing British unemployed to Canada by the shipload. The propaganda was motivated by the desire of certain interests in the old country to solve a political problem and encouraged by persons in Canada who wanted to flood the labor market and provide ten men for every job.

As an instance of the working of the scheme, the speaker said that advertisements in England were telling the people that coal miners were wanted in Canada at high wages when as a matter of fact there was a surplus of miners in every coal field in the Dominion.

"It's a lie," declared Mr. Heenan, "to say that the British unemployed do not want to work and that they are content to subsist on the dole. They want to work and so the false reports of lots of work and high wages in Canada are eagerly received."

"Canada ought to have something to say about this," he continued. "Canada ought to be past the stage where we can take up a paper and read calmly that a British magistrate has allowed a man convicted of a crime to go on suspended sentence if he migrates to Canada."

The Labor minister defended the movement of British miners to Canada for harvest labor, and pointed out that it was separate from immigration policy generally.

"We knew we could get men in other parts of the world," he said, "but the British government offered us 25,000 men, accustomed to hard manual work, and why should we turn down our own flesh and blood?"

### Gambling in Land Values

Says Prices All Over Canada Are Higher Than in England

London, Ont.—Gambling in land by all classes of Canadian citizens is one of the major reasons values are at such prices, declared A. G. Dailzell, of Toronto, speaking at one of the luncheon sessions of the Town Planning Institute of Canada convention now being held in the city.

The speaker quoted prices to show that land values were very much higher all over Canada than in England or other countries and he stated that the chief reason for this was a wholesale speculation in properties all over the Dominion.

### Must Carry Parachutes

Copenhagen.—Due to the frequency of accidents this year, all Danish military and naval aeroplanes will be equipped with Irving parachutes from Oct. 1. Military orders decree that no aviators should fly without a parachute attachment.

### Infantile Paralysis in Montreal

Montreal.—Four cases of infantile paralysis were reported at the city hall in the past week and Dr. Boucher, medical officer, has issued a warning to take precautions against an epidemic.

### Queen Marie May Marry

Rome.—An unconfirmed report was received here that Queen Marie, of Rumania, widow of the late King Ferdinand and grandmother of King Michael, may become engaged to a wealthy American.

### Entertained Prince George

Hollywood, Cal.—Prince George, who is a lieutenant of H.M.S. Durban now anchored at Santa Barbara, was and was the guest of Douglas Fairbanks and Mary Pickford.

### New British High Commissioner

London, Eng.—Sir William Clark, the new British high commissioner to Canada, accompanied by Lady Clark and their two daughters, are sailing for Canada on the Empress of Scotland.

Africa is inhabited with 140,000,000 black and 4,000,000 white people.

W. N. U. 1751

## Old Age Pensions Paid

Amount in B.C. Totalling \$441,222 Up To June Last

Ottawa, Ont.—Old age pensions totalling \$441,222 had been paid up to June last, to 3,150 persons in British Columbia who had taken advantage of the scheme, according to statistics just compiled by the department of labor.

Of this amount the federal government paid one-half. British Columbia's pensioners comprised 22 per cent. of the population of that province over 70 years of age. The average monthly pension was \$17.47, the pensioners being divided as 1,871 males and 1,279 females.

Property owned by these pensioners is valued at \$1,520,782. Of the pensioners in British Columbia, 271 were previous residents of Ontario, 257 of Alberta, 179 of Manitoba, 175 of Saskatchewan, 75 of Nova Scotia, 37 of Quebec, 18 of the Yukon, and 10 of Prince Edward Island. When any of these provinces come into the scheme a proportion paid to the pensioners in British Columbia will be charged to the respective provinces. Saskatchewan has been paying pensions since June and expects to have 1,000 on its payrolls in September. Manitoba and the Yukon will be paying pensions soon.

## Opportunities in Peace River

Lord Lovat Finds That British Settlers Are Doing Well in North Country

Edmonton, Alta.—"There are wonderful opportunities for British settlers in the Peace River country," declared Lord Lovat, chairman of the British Overseas Settlement committee, on his return to Edmonton following a week's tour in Canada's far-north country.

"We met several of the British families who were settled at various points throughout the Peace district under the 3,000 family scheme, and without exception, all these people are doing well, and are more than satisfied with their venture."

"Many of these men were miners, and few of them had any previous farming experience, but they are making good, and their experiences show clearly that given the will to succeed, luck of experience is no bar to success."

Lord Lovat found that over 3,000 homesteaders and settlers have gone into the Peace district this year, and everywhere there prevails a spirit of optimism for the future.

## Submarine Rescue Device

U.S. Navy Tests New Apparatus For Saving Ship Crews

Aboard Submarine Salvage Falcon, Off Solomon Islands, M.D.—Successful sea tests with the "lung," the navy's new breathing device, intended to enable men trapped in sunken submarines to reach the surface safely, have been made and if future tests prove as encouraging, all naval subs. will be equipped with them.

Three naval divers descended in a diving bell to a depth of 135 feet and arose slowly, breathing high at atmospheric oxygen through a mouthpiece from a rubber bag resting against their chests. They reported no discomfort. It is said to be the most practical device ever invented for the purpose.

## Will Publish Naval Accord

No Secret Clauses in Agreement Says Briand

Geneva. — The much-discussed Franco-British naval accord is to be made public by France through the League of Nations committee of disarmament.

Foreign Minister Briand of France, announced this decision after a speech before the League Assembly in defence of the agreements. He said the understanding would be introduced merely in passing, as an example of efforts being made to hasten disarmament.

In his speech he asserted that there were no secret clauses in the agreement.

### Natives Should Avoid War

Geneva.—An earnest appeal that native races should forever be kept outside the range of modern warfare, was made by Hon. J. S. Smit, South African high commissioner in London and representative of the League of Nations, in addressing the League assembly.

### Ex-Empress Dagmar III

Copenhagen, Denmark.—The ex-empress Dagmar, the 81-year-old widow of Alexander III, of Russia, and sister of Alexandra, the late Queen Mother of England, is seriously ill here.

## New 'Plane Tested

Demonstration At Los Angeles Proves Automatic Landing Feasible

Los Angeles.—A tiny 'plane constructed on a new vertical principle, made successful test flights here, demonstrating, observers said, that an aircraft can make an automatic landing.

Mr. F. Kelley, who piloted the 'plane, was said to have taken the craft from the ground on 8½ seconds, soared sharply upward, circled at 100 miles an hour and then landed with both hands aloft.

The new principle was described by A. A. Merrill, inventor, as tilting the wings, which are a single unit, in relation to the speed device in the cockpit.

The 'plane has a short fuselage and very little tail. In its construction the inventor was assisted by Dr. Clark Millikan, son of Dr. R. A. Millikan; Dr. Harry Bateman and Dr. A. L. Klein, all of the California Institute of Technology.

## U.S. Building De Luxe 'Planes

Passengers Will Be Assured Of Every Convenience For Comfort

Los Angeles, Calif.—Four aeroplanes, capable of carrying 20 passengers, equipped with luxurious private apartments and sleeping berths, are being built by the Keystone Aircraft Corporation at Bristol, Penn., Edgar Scott, president of the firm, has announced.

The new monoplanes, the largest ever built in America, are of all metal design and tri-motored. They can speed at 155 miles per hour. Provisions for hot and cold running water are made in the sleeping compartment and a radio will be installed.

## MOST OF BRITISH HARVESTERS ARE MAKING GOOD

Winnipeg.—"We are just finding out the slackers, that's all, and I am quite confident that the majority of the men are making good," declared Hon. Robert Forke, Minister of Immigration, following a conference regarding British harvesters, which he had with Thomas Gellay.

About six hundred have been sent back to England, Mr. Forke continued, and possibly two hundred more will go back as having failed to make good; but that left something like eight thousand British harvesters in the western fields, who were not being heard from because they were too busy working.

He had talked with the physician who had examined 200 of the men sent on their way home and only one out of the lot had been really physically unfit, and he was subject to epileptic fits. The others could have worked had they not lacked the will.

"There is plenty of work," said Mr. Forke, mentioning that 1,500 men had been wanted at Regina this morning. He had himself come back all the way from Ottawa to see that the five British harvesters on his own farm got a good start. He thought the farmers who cut the wages of British harvesters because of inexperience, were a little shabby," at the same time he agreed that men new to the work were bound to be inferior to experienced hands.

The minister warmly praised the work of Mr. Gellay in handling affairs at the immigration sheds under most trying circumstances. "No one could have done better," he said. All physically unfit British harvesters will be returned to the Old Country, Mr. Forke asserted, regardless of their desire about remaining here.

A non-political commission for the supervising of British immigration is not held to be a probability by the Minister of Immigration.

"I do not foresee any definite changes which would regulate the immigration question to a non-political field," he said. "It is likely that it will continue to be in the hands of whatever government happens to be in power."

## Mentioned For Important Post

G. W. Stephens, of Montreal, who has been mentioned as a possible successor for the post of Canadian minister to Tokio.

## To Aid Non-Agrarians

Reduced Fares Arranged For Families Of Settlers Not Employed On Land

Ottawa.—Details of the extension of the assisted passage scheme to the wives and children of British settlers not employed on the land in Canada have been announced at the department of immigration. Assisted passages were formerly only given families of those who settled on the land.

A reduced steamship fare of \$18.25 has been arranged through the co-operation of the British and Canadian Governments for the wives and children of those who were satisfactorily settled in Canada on June 6, 1914. Children under 17 years of age will be free. The Canadian Colonist railway fare to the destination is the only added charge. The arrangement has been made in order to implement a recommendation of the agriculture and colonization committee made on June 5 last.

In order to avail himself of the reduced rates for his family the settler need only establish that he is successfully established in Canada and has a reasonable prospect of being able to support them.

## To Reduce Traffic Accidents

Saskatchewan Government Would Encourage Garages To Use Head-Light Testing Apparatus

Regina.—Following up the recent conference called to consider ways and means of reducing traffic accidents, the Saskatchewan Government is now encouraging garages and filling stations to equip with a testing device for headlights, to allow a driver to quickly ascertain if his lights conform with provincial law.

The Saskatchewan law is that the beam must not be thrown higher than 42 inches at a distance of 75 feet. If the equipment installed by the service stations were found to come up to government standard, the government would then consider the plan of allowing the proprietors to issue certificates to drivers.

## Refuse Trade With Russia

Labor Congress Rejects Resolution To Resume Relations

Toronto, Ont.—Following a heated debate the Trades and Labor Congress of Canada rejected a resolution favoring the resumption of trade relations with Russia. Sponsors of the resolution contended that Russia was the only country in the world where the working classes were in control, and that there was a ready market in Russia for products of Canadian industry.

Australia Buys B.C. Apples

Winnipeg.—Commencing with the first of this month the importation of Wealthy apples from British Columbia to South Africa was resumed. For some time this fruit trade was neglected but is now being built up again with the result that one Canadian Pacific Railway carload of the Wealthy variety was shipped from Salmon Arm.

## NEW CABINET IN BRITISH COLUMBIA

Above are pictures of four members of the new cabinet in British Columbia. The year: 1, Premier F. T. Tomlin; 2, W. C. Shelly, minister of finance; 3, Joshua Hinchcliffe, minister of education; 4, R. H. Pooley, attorney-general.

## Ramsay MacDonald Sails

Says He Is Sorry To Leave Canada, But Will Return

Quebec.—"I have left my heart behind me, and am sorry that I did not miss the ship, in order that I might see more of Canada," declared Right Hon. Ramsay MacDonald, former premier of Great Britain, as he mounted the gangway of the Empress of Australia en route for Southampton.

"I am going home full of most pleasant recollections of Canada. You have a wonderful country," he added, "and I hope to be back again next year. If it were left to me I would be back again next month."

"Just as soon as ever I get back to England, I will plunge right into the political fight. The annual meeting of the Labor Party at Birmingham takes place first, and then I shall go to the continent for two weeks, but after that I shall get right into the thick of it, and prepare for the general elections, which will take place next year. The results will be very good for us."

## Fire Destroys Famous Hotel

Manoir Richelieu At Murray Bay Is Smoldering Ruins

Murray Bay, Que.—All that now remains of the Manoir Richelieu, famous Canadian summer hotel here, is a smoldering waste of crumbling stone, charred rafters and twisted steel girders. Fire of undetermined origin destroyed the famous hotel which for years has been a mecca for tourists from other parts of Canada and the U.S.

According to officials of the Canadian Steamship Lines, in Montreal, the loss estimated at \$500,000, is fully covered by insurance. Plans had recently been drawn up for the erection of a new building to be operated in conjunction with the manoir but now it is stated these plans will be altered to include the construction of an entire new building, which will be erected probably on the site of the destroyed manoir.

## Nova Scotia Nominations

Liberals Will Have Candidates To Contest Every Seat

Halifax, N.S.—With 24 candidates already selected, and 11 conventions on the book, the task of choosing representatives of both parties to contest in the provincial election is more than half completed.

Among the four Conservatives re-nominated was Col. Gordon Harrington, Cape Breton Centre, minister of mines, the fourth member of the Rhodes cabinet to re-offer. Six opposition candidates were chosen.

It was definitely stated by Liberal organizers that no seats will be conceded the government by acclamation.

## Plot Nipped In Bud

Numerous Arrests Made In Spain Following Discovery Of Plot Against Government

New York.—Reports from the Franco-Spanish border say numerous arrests have been made in Spain after the discovery of a plot against the government of Primo De Rivera, who is about to celebrate his fifth anniversary as dictator of Spain.

A Hendays, France, dispatch, says the arrests were reported to have been made in Madrid and other Spanish cities.

## EVACUATION OF RHINELAND TO BE CONSIDERED

Geneva.—There are indications that Foreign Minister Briand of France, was ready for serious conversations on evacuation of the Rhineland.

In order to remain in Geneva for a second meeting of the powers on the question M. Briand cancelled a trip he had intended to make to Paris to attend a cabinet meeting.

At the first meeting on the subject, M. Briand, Chancellor Mueller of Germany, Under Secretary Von Schubert of the German foreign office, Lord Cusheund of Great Britain, V. Scialoja of Italy, M. Hymans of Belgium and M. Lachi, of Japan, conferred.

Both M. Briand and Herr Mueller were smiling when they left the meeting. A communiqué issued later said:

"Conversations have commenced on the question of evacuation of the Rhineland, the discussion is still continuing and will be resumed on Thursday."

## FEDERAL AID IS PROMISED FOR GRAIN CONGRESS

Ottawa, Ont.—Dr. J. H. Griesdale, deputy minister of agriculture; D. T. Elderkin, manager of the Regina Fair, and J. H. Mooney, prominent western grain grower, have been holding conferences in regard to the world's seed exhibition and congress to be held in Regina in 1932.

It has been agreed that the Federal Government will assist generously in staging the congress, and a prize list of \$200,000 is assured.

There will be valuable prizes for six-pound samples of various varieties of wheat, ten-bushel exhibits of barley, oats, rye, buckwheat and corn, and also for clover, alfalfa, rice and millet.

A further conference has been arranged for November and will be held at Regina. To this conference those in charge of the congress will invite experts in agronomy, field husbandry, marketing, and brewing and distilling, and more detailed plans will be formulated.

## Abandon Polar Search

Italian Government Gives Up Search For Possible Survivors Of

Balloon Disaster  
Rome.—Abandonment by the Italian Government of further search for possible survivors of the "balloon party" in the Noble Arctic disaster was seen when an announcement was made through the Stefani News Agency that vessels now in Spitzbergen waters would be recalled.

The announcement said that the rapid advance of polar winter, with the imminence of 24-hour darkness and frequent recurrence of storms, made further aeroplane search impracticable.

The Norwegian icebreaker Braganza, which has been under charter soon will be released. When this is done the Citta di Milano base ship of the Noble expedition will leave King's Bay on the journey Southward.

## Chamberlain Is Improving

Health Of British Minister Of Foreign Affairs Is Much Better

Hamilton, Bermuda.—Sir Austen Chamberlain, British minister of foreign affairs, walked unaided down the gangplank of the steamer Orcoma here in a drizzle of rain. He and Lady Chamberlain and their children embarked on the launch of Col. E. B. Leigh, acting governor of Bermuda, and went ashore for a few hours stay at Clifton, the Leigh home at Prospect.

This is the first port in Sir Austen's long voyage at which he had disembarked. Observers contrasted his unaided steps down the gangplank with the fact that he was carried aboard the ship at Liverpool. Members of the party said that he was showing steady improvement in health.

## Gas Poisons German City

Sulphurous Fumes From Lignite Mines Create Panic In Halle

Halle, Germany.—This city has had a taste of what it might expect in future wartime when aviators attack cities with gas.

A cloud of sulphurous gas was blown over the city from nearby lignite mines poisoning hundreds of residents, including many children. Many were made so ill they had to be treated by doctors.

The whole population was thrown into panic. It was necessary to close the schools.

## Los Angeles-New York Bus Service

New York.—Regular daily bus service between Los Angeles and New York was started Sept. 11, with the arrival of the first big automobile. Cars are to leave the two cities daily, making the transcontinental trip on a schedule time of five days and fourteen hours, or a day longer than the average train time.

## France To Honor Tunny

Paris.—Convicted that Gene Tunney learned all about boxing in France, French sportsmen are affixing a plaque to a gymnasium at 26 rue de Pontoise where Tunney, as a Marine, in 1918, took some boxing lessons.

## Bomb Factory Unearthed

Lisbon, Portugal.—Government police discovered a bomb factory in Beja, town of S. Portugal. Many bombs were seized and numerous arrests were made.

## Experiment With Flax Straw

Two Tons Threshed Flax Straw From Saskatchewan To Be Sent To Glasgow

Experiments to be conducted with two tons of Saskatchewan threshed flax straw in Glasgow, Scotland, may result in the establishment of "several factories" in this province.

This is the prospect pictured by R. L. Pritchard, director of the Pritchard Flax Fibre and Pulp Company, Ltd., Glasgow, Scotland, in a letter to the provincial authorities.

Mr. Pritchard asks that two tons of threshed flax straw be shipped to his firm. He wants the straw baled in the smallest possible bulk in transportable bales of two to four hundredweights each and put on rail to the nearest Eastern Canadian port and shipped to Glasgow.

"We desire to have this waste flax straw after threshing with which to experiment and make flax low from it," writes Mr. Pritchard. "We trust the economic value of this waste flax cultivation of your North West will gain your co-operation in ascertaining what value there is in these short lengths of flax straw which are of no practical use at present."

"In the working of this waste there is no retting or soaking by our process as the operation of the fibres in short pieces is only mechanical. We would like to know what quantity of this waste flax straw could be procured throughout Saskatchewan; what distance the growers would deliver it at the most opportune time after their harvest is finished and what price per ton would induce the flax growers or threshers to save it and deliver it."

"If the quantity and cost of procuring it would be an inducement to the company, we would establish several factories to work the straw into fibre in Saskatchewan so that the fibre only would be required to be transported which would greatly lessen the freight."

The provincial authorities will take steps to secure the required quantity of flax straw and the information sought by Mr. Pritchard and do all that is possible to encourage another industry to locate in the province.—Regina Leader.

## Question Of Dieties

Vitamin Cure For Deficiency Disease Discovered In 1911

In 1911 Dr. Funk discovered the vitamin cure for beriberi, a deficiency disease due to removal of the vitamin cover of rice. Soon the vitamin cures for rickets, polyneuritis, scurvy, pellagra and other deficiency diseases were discovered and called vitamins A, B, C, D, the first being fat-soluble "A" and found in fatty foods such as butter, cream, cod liver oil, liver, kidney, egg yolk, germ of cereals, flaxseed, carrots, sweet potatoes, etc. The water soluble "B" vitamins are found in succulent vegetables such as cabbage, cauliflower, celery, lettuce, parsnips, spinach, potatoes, corn, beans, fruits, nuts, milk and yeast.

## More Worried For Bill

The record of a baptism, 1904, founding a Cottenham, England, church, refers to a John Coudledge, believed to have been an ancestor of President Coolidge. This would have been enough to make Mayor Thompson, of Chicago, go on a rampage in the days before his recent collapse.

"Well, now, what time do I have to get to work mornings?" asked the new hired man.

"Any time you like," responded Farmer Fumblegate. "So's it ain't later than half-past four."

Birds have an extra eyelid which can be drawn over the eyeball to protect it from the strong sun while the proper eyelid remains open enabling them to see.

Bath Abbey possesses so many windows, that it is called "The Lantern of England."

"My husband and I have a joint bank account."

"That must be very awkward."

"No. Very convenient. He pays the money in and I draw it out."—Pete Mele, Paris.

## Indians Show Interest In Red Cross

Blood Indians Of Alberta Impressed By Exhibit Shown At Lethbridge Fair

At the annual fair in Lethbridge, Alberta, where the Provincial Red Cross had an extensive health exhibit, large numbers of Indians from the Blood Reserves were interested spectators at the booth. Squaws gray with blankets of many colors and kerchiefs of brilliant hue gathered round to hear the story of Red Cross among the sick and crippled children of the province.

The old chiefs were especially impressed by the fact that some of their own tribes had sent children to be cared for in the Calgary and Edmonton Hospitals. The names of the little patients were received in solemn silence but a look of profound wonder stole over their bronze countenances as they saw the pictures of lame feet straightened, and twisted limbs restored.

Little Susan Medicine Pipe was a recent patient, while the son of Two Skins is waiting for a vacancy in the wards.

A tall, princely looking young brave, Mountain Horse, offered to assist the Red Cross in its annual campaign for funds, and his mother came forward with a promise to send some hand-made beaded moccasins as her contribution to the little sick children in hospital.

## Uses Novel Rest Cure

Noted Author Finds Handkerchief Over Eyes Keeps Nerves

"Sir Gilbert Parker, the novelist, who recently returned from Palestine, where he went to get data for his novel on David, has, lying about in his flat, a long blue and white spotted handkerchief on the arm of a chair, folded in the shape one uses to blindfold anyone. Asked what it was for, Sir Gilbert said, 'I went into Sir Henry Irving's dressing-room one evening. He was lying down with a big silk handkerchief, such as this one, over his eyes, and he said, 'I do this to get ten minutes' sleep every evening; it rests me!'"

"I bought two handkerchiefs," added Sir Gilbert, "and tried the same effect. I am a very heavy sleeper, but when I travel now I tie one of these handkerchiefs over my eyes, eat very little for the first two days, and I haven't been seasick for the last 27 years. Now, when I am dictating, I tie a handkerchief over my eyes as well. The world is shut out. The handkerchief keeps the nerves of my eyes quiet, and so I can dictate for one or two hours without fatigue."

## Reliable Weather Forecasts Predicted

Accurate In About 200 Years Says Boston Meteorologist

Weather forecasts may be expected to be accurate in about 200 years, according to George A. Loveland, Meteorologist of the United States Weather Bureau at Boston. Mr. Loveland declares that with the passing of two more centuries sufficient data will have been collected to make reliable forecasts possible.

Forecasts at present are about 85 per cent. correct, he declares. The weather is controlled directly by the sun, he says, but while astronomy is an exact science which has been studied for centuries, meteorology has been studied for about three quarters of a century.

When the effect of the sun's heat on the earth has been studied for two centuries more, Mr. Loveland hopes the meteorologist can with accuracy predict the weather far in advance.

## Not Altogether Correct

Interviewer: "I have been informed, sir, that you began life as a poor bricklayer."

Great Contractor: "There are two mistakes in that sentence. I began life as an infant, and there is no such thing as a poor bricklayer."

Husband—"If you hadn't taken so long to get ready we shouldn't have missed that train."

Wife—"Yes. And if you hadn't hurried me so we shouldn't have had so long to wait for the next one."

The Guest—"I say, waiter, I believe it's bad form to speak disrespectfully of one's elders?"

The Waiter—"So I've heard, sir."

The Guest—"Then I will be silent about this chicken."

The custom of referring to important people as "nobles" has its origin in the "il nob," abbreviated Latin for "son of a nobleman."

The vessel, whose white winter coat forms the ermine of commerce, is found in various forms from the Arctic to the Tropics.

## Would Collect Relics Of Gold Rush Days

Few Reminders Of Past On Old Cariboo Road

Efforts are being made at Kamloops, B.C. to preserve for posterity some of the few remaining relics that marked the picturesque gold rush of the old Cariboo Road.

The road is now a motor highway becoming increasingly popular with tourists, but a few years ago it was traversed by covered wagons, ox teams and pack trains, while during the height of the Cariboo gold rush camels were brought into use as beasts of burden.

Before the country was opened up by the Pacific Great Eastern Railway and the automobile, practically all the freight was carried in huge wagons hauled by a dozen or more oxen or horses. But today the highway has been completely motorized and there are few reminders of the past except the old log-built roadhouses that years ago were the sole outpost of civilization in wide stretches of wild country.

Isaac Lehman, of Ashcroft, possesses one of the huge freight wagons which, hitched with a couple of oxen behind sixteen or twenty oxen, could have been seen winding its devious way along the Cariboo road in the old days. It is one of the few that remain and Lehman will give it to anyone who wants it.

Lying along the roadside between Quesnel and Barkerville in the old gold country of northern Cariboo is one of the famous B.X. Express Company's wagons, slung on leather before the days of steel springs. It is rapidly falling into decay. In Quesnel is the famous old coach in which governor-generals and multimillionaires rode to the goldfields. No effort is being made to preserve it.

Representations may be made to the provincial government to have these relics collected and restored so that they may serve as a reminder of the province's most romantic pioneer era.

## Treatment To Control Smut

Result Of Experiment Conducted By O.A.C. Expert

Experiments conducted in "Kont County by a member of the staff of the O.A.C. are reported as follows: In addition to formalin, nine different substances were tried for the control of smut, some in the form of dusts and some as liquids. The smut in these plots varied from 1.2 per cent. to 12.4 per cent., except the formalin spray which had only a trace of smut. The untreated plots had 24.6 per cent. smut. Hullest oats were treated with formalin both as the spray and sprinkle methods and with copper carbonate dust. Where formalin had been used there was germination injury, where copper carbonate had been used there was only a trace of smut and where no treatment had been given there was 59.2 per cent. smut.

## Aged Indian Visits England

The venerable chief, White Eagle of the Ojibwa Indians, who is now in England, is said to be 105 years old. He has been across the ocean before and was eyed with interest by many Britons during the Queen Victoria Jubilee in 1887. He was born in Colorado when Pike's Peak was a pup, and has seen about everything that could happen to the West. He is a good Indian—and still a live one.

The first perambulator was built in 1780 for the baby daughter of the fifth Duke of Devonshire.

## Class "A" Fairs

Western Canada's Fine Big Fairs Were Most Successful This Year

On the whole the five big western fairs this summer were an unqualified success. The first of these, at Brandon, was seriously hampered by frequent rains, and while this could not affect the quality of the exhibits, generally, it did curtail attendance, adding nothing meanwhile to the comfort of the visitors at any time. The remaining four shows had the finest of weather, and new attendance records were created at each of them. Featuring the livestock exhibits on this circuit were outstanding entries from outside herds in the beef cattle classes. A uniformity of type and quality seldom attained in widely separated herds was particularly noticeable in Shorthorn classes, and the competition in both Shorthorns and Angus with American entries providing an international aspect, was especially keen. Dairy herds from five provinces were strongly in evidence at a number of these fairs, and here again competition was of the best. At all points local entries in the more important classes of livestock were fewer than might be desired, this being, perhaps less due to the Regina exhibition than to the others. Competent critics declared the Regina Fair to be outstanding in regard to its stock entries.

The far famed Calgary stampede attracted visitors from all parts of Canada and the United States, and the popularity of this event continues to grow. A perfect week of hot weather boosted the gate at Edmonton. Saskatchewan experienced only one deluge of rain and this proved no deterrent to the eager crowds. New buildings and equipment replacing that lost through fire earlier in the season were completed and ready for the big event, and the Saskatoon management are to be congratulated on the initiative and enterprise which they displayed.

## Always Prepared For Guest

Ancient Castle In Ireland Keeps Up Interesting Customs

On the north shore of Dublin Bay stands Howth Castle, an ancient Irish stronghold. It is now owned and occupied by a retired naval commander and a former shipmate of King George when Prince of Wales, who is careful to keep up its old traditions. At every meal, for instance, an extra place is provided at the table, and is reserved for any stranger arriving.

The origin of this interesting custom goes back to ancient times, when the heir of one of the Lords of Howth was kidnapped by gypsies, and only given back on condition that the hospitality of the castle should never be refused to anyone.

## Where Canada Leads

Statistics show that Canada now leads the world in the production of nickel, asbestos, hydro-electric power and newsprint. The Dominion has the second greatest number of telephones in use, the second greatest number of automobiles, and the second greatest coal resources, and is third in the production of silver, gold and aluminium.

A visitor to a harvest festival service at a country church was admiring the beautiful flowers on the altar and elsewhere.

"Yes," said the old verger, "they are very nice, I'll admit. They are given away to those who are sick after the sermons."

## Newspapers Of Early Period

English Mercurie, Published In 1588, Tells About The Spanish Armada

In answer to the claim made recently in Germany to the effect that the copy of the "Augsburg Avis," dated 1599, now on exhibition at the International Press Exhibition at Cologne, is the oldest newspaper in existence, J. W. C. Bestland, 214 East Broadway, a collector of rare manuscripts, has produced a copy of the English Mercurie, printed in 1588 which he claims is the oldest original newspaper in the world today.

The English Mercurie, which was printed in Whitehall, Eng., on July 23, 1588, carries an account of the sighting of the Spanish Armada off the coast of England.

It is 7 1/2 by 9 1/2 inches in size, contains four pages and is printed on hand-made paper. It was printed during the reign of Queen Elizabeth by Christ Baker, Her Majesty's printer.

Bestland also has a copy of The Weekly News, printed in London in 1605 for Jeffrey Chorton, to have been sold at Chorton's shop at the great door of St. Paul's Church in London.

It was printed during the week of Monday, January 31, of that year, and contains an account of the execution of Guy Fawkes and seven other persons who endeavored to bomb the House of Parliament during the reign of King James.

The account is headed "Gunpowder, Treason and Plot." The foregoing papers were purchased thirty years ago by Bestland in England at which time he also secured an English prayer book which was printed in 1609.

Bestland also has a copy of The News, printed in London in 1665, containing an article describing the great smallpox plague that occurred in that city during that year. It was published by Thomas Newcomb, of London.

A copy of The London Gazette, published Monday, September 10, 1666, giving an account of the fire that swept London a week preceding the date, is also owned by Bestland, who claims that these publications are original and the first one mentioned is, so far as he has been able to learn, the oldest in existence.

## Stuart River District

Western Canadian Business Man Establishes Model Farm In B.C.

J. G. Whiteacre, a well known western Canadian business man who is developing a model farm in the Stuart River District, Central British Columbia, advises that growing conditions have been favorable along the Stuart this year, and that he has excellent crops of wheat and oats. Mr. Whiteacre is performing a great service for the Stuart River section in the efforts he is making to place agriculture upon a profitable basis, the Mandaley being the model "ranch" of the interior. The Stuart lake and river district is one of the most beautiful parts of British Columbia and the pioneer settlers are establishing some very fine farms. The country abounds in game and the finest of trout and other fish are found in every lake and stream.

Sandy (to his daughter)—Young McPheerson has asked me for your hand, and I have consented. Daughter—You dear old dad! Sandy—So never mind going to the dentist's now to have that tooth pulled—wait until you are married.

Venus is almost exactly the same size as the earth.

## The Influx From Overseas

Steady Stream Of Settlers Coming Into Western Canada

Settlers have been coming into Western Canada in a steady stream since the beginning of the year, and nearly all have gone direct to the farming districts to take up land or to take employment with farmers. Many came to join relatives or friends already settled. Since January 1st, to the end of August, 41,301 settlers from overseas passed through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railways. Of this number 6,000 were British workmen who came out to take part in the grain harvest, many of whom, it is expected, will remain in the country for the purpose of taking up land. The others were mostly agricultural folk from Great Britain, Scandinavia and other northern and central European countries. In addition to regular trains, it required 82 special trains to transport these people from the seaboard, and inspectors of the department who meet all trains carrying immigrants, travelled no less than 44,148 miles in the performance of their duty. In addition to the influx from overseas, a large number of farmers and others have come to Western Canada from the United States this year. Not a few having been attracted by the mining developments.

## Russians Are Clever Students

New Canadians Make Most Creditable Showings At School Here

The Edmonton Journal says editorially: "A Russian lad who started at school in Calgary four years ago without a word of English has made an average of 91 in Grade 9 examinations. On one subject he made 100, and even on English literature, in which a foreign-born student is naturally at a disadvantage, he was marked 84. The achievement of this Calgary boy goes along well with that of a Russian girl in Toronto who at 15 did not now any English and at 19 was declared a brilliant student at Toronto University. It will not do to be scornful of the new Canadians. They have great possibilities, even as scholars, and these two young Russians who have so distinguished themselves are cases in point."

## Oldest Tennis Court Found

Built In England Four Centuries Ago By Henry Eighth

Four hundred years ago King Henry VIII. built the oldest tennis court extant in this country. The "bluff" monarch had taken over the great Palace at Hampton Court, which Cardinal Wolsey had built for himself out of his ample revenues; but it needed one or two little luxuries, and the tennis court was one. King Hal himself was a player here, and Elizabeth an onlooker, if not more.

The most famous of onlookers was probably William Shakespeare, for here he and his company appeared before the court in a round of festivities, which included play of every kind. Greatest of all the games played on this historic court was that one in May, 1585, when our renowned champion, George Lambert, lost his world position to Thomas Pettit, the American, by five sets to seven, in a contest occupying three days.

"These rich people make me sick. What's the use of having money if you don't know how to enjoy it?"

"Well, what's the use of knowing how to enjoy it if you haven't got it?"

Employment Bureau Manager: "So you'd like to employ a mason. What kind do you want?"

Employer (a Scot): "I'd like to have one of those free masons I've heard so much about."

A German engineer is building an automobile 120 feet long, with fuel capacity for a month's travel, to use in the Sahara desert.

"Suddenly a man rushed out and said to me, 'Hands up, or I will blow your brains out.'"

"And did it?"—Lustige Kolner Zeitung, Cologne.

## RAILWAY OFFICIALS AND DIRECTORS ON TOUR

E. W. Beatty, chairman and president of the Canadian Pacific Railway, photographed at the C.P.R. Station, North Toronto, recently together with the party of business men and directors of the company who are accompanying him on an extended inspection of the railway's lines and activities throughout the Dominion. From left to right: A. D. MacTier, vice-president eastern lines, Dr. W. W. Chipman, Hon. Senator Smeaton White, Ross H. McMaster, C.P.R. director, and president of the Steel Co. of Canada, Sir Charles Gordon, director of the C.P.R. and president Bank of Montreal, W. A. Black, C.P.R. director, E. W. Beatty, Sir Herbert Holt, C.P.R. director and president of the Royal Bank of Canada, F. W. Molson, C.P.R. director and Beatty, Lemay, general manager Banque Canadienne Nationale.

#### CHAPTER I.—Continued.

"Good-bye old pal," Donald whispered, his arms about the collie's shaggy neck. The dog turned slowly and unwillingly toward the house. In the meantime, within the house, John McLean and his wife were discussing the possible result of the father's seeming severity.

"Donald is a great trial to us now, John," said the mother, "but we must not forget the happiness he has brought us in the past." She gazed long and lovingly at a photograph of her son as a child; then, with head bowed, her lips moved in silent prayer.

Upon his arrival at the wharf Donald found his baggage, destroyed the pass he had been in the habit of using, as his father was owner of the steamboat line, and bought a ticket to Bangor.

Reaching Bangor, he chose less expensive quarters than was his custom, locating at the Penobscot, on Exchange Street. In no mood for sleep, he decided to take a stroll. Outside an all-night restaurant was a long string of cars, and from within came the sound of happy laughter.

A feeling of loneliness, coupled with a slight hunger induced him to enter a big man sitting at the counter, attacking vigorously a T-bone steak, was the centre of interest, as evidenced by the cluster of taxi-drivers and other night-lunchers about him. He wore a wide-brimmed hat, high leather boots, corduroy trousers, a blue flannel shirt, and a red-mackinaw coat hung on the wall behind him. Blond, sun-washed hair stood up from his head aggressively, and his steely blue eyes were set in a face tanned a brick red.

"Yes, sir," spoke the blond giant between mouthfuls, "she's a he-man's country, she is. None of your bum chow that I used to get here in these Eastern loggin' camps, sow-belly and beans three times a day, and work in for forty dollars a month from daylight until dark, sir, sure! Me for the Coast with his four bucks a day. And talk about grub! Say, there ain't any hotel that puts up better scum than we get in the loggin' camps in good old B.C."

He looked around at his audience, and convinced that they were interested, he continued: "Yes, sir, British Columbia for mine. Say! What'd you think of three fir logs that makes a carload? Or cedars ten feet through? Of alders that you can't get your arms round? Some different than them toothpicks you got out there," jerking his thumb contemptuously toward the Penobscot River. "And minerals," he went on, "the mountains are filled with 'em—minerals and mines that ain't never bin prospect. Prospectors come in every day with new strikes. And talk about fish! I seen the fish so thick they choked the rivers; you could darn near walk on their backs. That's the country, fellers. That's the place for men with git-up-and-git." He finished his repast with a gulp of coffee, fished a sack of tobacco and brown paper from his pocket, and rolled a cigarette. "A brand new country," he ran on, his eyes shining with enthusiasm, "that ain't half explored yet, and richer 'n a pall of cement. How much do I owe you, boy?" he asked as he drew out a wad of banknotes, peeled a bill from the outside

of the fat roll and threw it carelessly on the counter.

"Keep the change," he said with a lordly air, then swaggered through the door. Several of the taxi-drivers followed, loudly importuning him to ride.

Donald finished his lunch and sat for a time smoking.

"That guy was a nut to flash his poke in front of that gang," observed the waiter, "Guess he's big enough to take care of himself," he added.

As Donald stepped out of the restaurant he saw the big man across the street with four of his former auto-leads. From the shadow of a doorway he saw the party enter a ramshackle building, after hearing one of them promise to get the Westerner a drink in spite of prohibition. Donald decided to walk by the place, and was startled by the sound of crashing glass and indications of a struggle.

"You will, will you?" he heard the unmistakable voice of the big Westerner.

With a bound Donald was at the door. He found the Westerner badly battered, but holding three men at bay. The fourth lay in a crumpled heap in the corner.

Only one of the men noticed Donald's entrance. He was a big, burly brute with the swarthy features of the Southern European, and he came straight for the intruder, crouching low. Donald's left hand caught him on the eye, and as his head flew back Donald crossed viciously with his right. The blow landed with an impact that sounded like a cleaver sinking into a meat block, and the man dropped as though struck.

A rattled man, standing near a side door with a bottle in his hand, shouted a warning as Donald sprang to the Westerner's assistance. Both men turned their heads. The ham-like fist of the big blond giant struck the larger of the two men such a terrific blow on the side of the head that the recipient whirled completely around and sank dazedly to the floor. "Duck!" yelled Donald, as he saw the little man's arm go back. The Westerner dropped, and not a second too soon. The bottle whizzed over his head, bringing a shower of plaster from the wall where it struck. With a curse the big man turned, but the little bottle-thrower had disappeared through the side door. The remaining bug, a tall, cadaverous looking youth, took one wild look round, then bolted through the front door.

The Westerner, gasping and rather pale, seized Donald's hand in his huge paw. "Pardner, you saved me from a hell of a lickin'! 'Bout two minutes more and . . ."

"Grab you and hat and we'll get out of here before the police come," interrupted Donald. They went through the alley to Hammond Street, then down Exchange Street.

"Better come up to my room and have those cuts attended to," suggested Donald. The Westerner touched gingerly the rapidly swelling lump over his ear. "You know," he observed, "those fellows never intended to start a rough-house. The little dip was pretty slick, but I caught 'em with his hand in my pocket, and when they saw that they had a fight in their hands, they tried to lay me out with a billy. Should have seen the funny look on that little rat's face when he jammed me with that loaded stick and I didn't go down. Guess this old bean of mine must run pretty heavy to bone," he finished with a chuckle. He looked at Donald curiously. "You sure handed it to that big dago quick. How did you horn in on the row anyway?"

Donald told of being in the lunch-room when he had displayed his

money, and of the waiter's subsequent remarks.

"Huh!" snorted the big man disgustedly, "guess I need a guarder." With the assistance of the obliging night-club, who furnished antiseptic and court plaster, they patched the hurts of the much-bruised Westerner.

"When the clerk left the room the big man turned to Donald. 'My name's Jack Gillis. What's yours?'"

"Donald McLean," he answered, looking Donald over critically. "I'm visitin' my old home in Nova Scotia," he ran on. "Come down here to visit my sister. I'm gittin' homesick for the Pacific Slope, and I'm goin' to hit for B.C. tomorrow mornin'."

"I'm on my way to Vancouver," said Donald.

The effect of this statement on Gillis was electric. "Do you belong in B.C.?" he questioned excitedly.

Donald told him how his glowing description of that land of promise had induced him to go West, and that this would be his first visit to the Coast.

"Well," observed Gillis, "I've been the means of addin' a man like you to the population of B.C. then Jack Gillis has done some good."

"That's a real compliment," smiled Donald.

"I'm goin' on the mornin' train," remarked Gillis. "I'd like to have you travel with me."

Donald nodded.

(To Be Continued.)

### Canada Wants No Shirkers

Lord Advocate For Scotland Says There Is No Place For Whiners Here

Canada is no place for "winners," the Rt. Hon. H. P. Macmillan, Lord Advocate for Scotland, said in an address to the Victoria Canadian Club in referring to the troubles over imported English mine workers for the prairie harvest fields.

"I should like those who came to this country to read a little of Canadian history and understand some of the hardships faced by the pioneers here, by their womenfolk and their children to develop and settle this country," Mr. Macmillan said. "Workers who come across here and whine and complain of hardships don't know that they are born. This is no country for whiners. It would never have progressed as it has unless the people who came here, your fathers and some of you yourselves, had been willing to endure hardships. 'The man who comes here can't expect to land on a down pillow at once, but must face the spirit of the new land. Canada wants no shirkers. 'And I am sure those who come here and are willing to work and pioneer will be treated in the right spirit as they always have been: I am satisfied from what I have learned and seen on my way across, that among those who merit a welcome will receive it.'"

### Music Was Wedding Gift

Carried By Radio and Telephone From Switzerland To Manchester, Mass.

Ernest Schelling, renowned pianist, sat in his villa at Coligny, Switzerland, and played wedding music which was heard at Manchester, Mass., U.S.A., by guests at the wedding of Miss Anne Bulen Demmett, daughter of Mr. and Mrs. Carl E. Demmett, of Boston and Manchester, and William Chase Paulson, of Santa Barbara, Cal.

The music, which was carried a distance of approximately 4,000 miles by telephone and radiotelephone, was the wedding gift of the pianist who is an intimate friend of the bride's father.

The ceremony took place at 5 o'clock, and 6:15, during the reception, the telephone brought to the Demmett drawing room the strains of Mendelssohn's wedding march. This was followed for half an hour by a number of Mr. Schelling's own compositions.

The music was conveyed from Switzerland to London by telephone, thence by radio to Boston, where it was relayed to Manchester.

Farmers whose land was used by passing picnic parties report that this years crop of pop bottles, popcorn boxes and bread crusts should run about 25 bushels to the acre.

One view of an athletic man is the fellow who hires a small boy to cut the grass so he can play golf and obtain a little exercise.

A lightning conductor does not attract lightning. It merely conducts the electricity to earth when lightning strikes a building.

Horses have no eyebrows, and fishes no eyelids.

# Christie's Biscuits

The Standard of Quality Since 1853.

By appointment to His Excellency the Governor General and Vicecountess of Winnipeg

by the Mothers of Canada

Every year more and more Christie's Arrowroot Biscuits are sold because their Purity and High Quality has always been maintained. In the store or on the phone, always ask for Christie's Biscuits.

### Chinese Habits and Customs

Everything Is Done Directly Opposite To Western Style

When two Chinamen meet they shake hands with themselves, not with each other. The chief topic of their conversation is food. The boys in China have girls' names and wear earrings; the men fly kites and play marbles; the women wear trousers. Chinese ships have no keels; the roses no scent. Books are read from the back forward and from the right to left. A Chinaman scratches his foot instead of his head when he is puzzled. He can divorce his wife for talkativeness. He never quits a job, but gets a leave of absence and forgets to return.

A Chinaman's dinner starts with dessert and ends with soup. He pays more for suet than for beef. Most of his money is made of brass. All domestic servants in China are men. They never talk back to their employers.

Chinamen take a servant along with them to help at table. Should the invited one be forced to remain at home through illness the dinner is sent to him. Chinese who can afford it boil their fish in wine. And, if they are rich enough to do so, use silver tooth picks. All beverages are served piping hot in China. John Chinaman rubs freely of cups that inebriate, but is seldom seen in an intoxicated condition.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

### Learned His Lesson

"Lots of reading on it," he observed, as he perused the text of the bond application with great interest. "Huh!" remarked the clerk with the paper. "I'll bet you didn't return your marriage license that carefully."

"Maybe not," was the reply, but ever since I signed that I'm reading everything."

Alpha—"What was the denomination of that bill you loaned me?" Theta—"Episcopalian, I guess; it keeps lent."

Friction is greater between soft substances than it is between hard substances.

THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word genuine printed in red:

### Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

#### THE WISDOM TOOTH

Otherwise the third molar, the word "Wisdom" being of no real significance excepting as it relates to the period of eruption which is at the approach of adult age.

Perhaps it has been your good fortune not to have had this tooth erupt, for in truth, it is often a trouble bearer; is the dental "degenerative"—generally stunted in size, but frequently absent altogether—but why missing?

This—the gradual lessening of the function of mastication and the reduction of the force of jaw movement—due to the substitution of softer and less gritty foods by civilized man, has led to a marked degeneracy of the dental mechanism.

So that, through economy of growth, due to disease, the tooth germ may fail to develop; or, developing, the jaws are so greatly contracted (through disease), that frequently there is lack of space for it to erupt into position—a condition analogous to that of the eyeless fish of the Mammoth Cave—Nature cutting off that which goes unused.

Just a word more: Occasionally the unnatural retention of this tooth in the jaw—so-called "impaction," leads to serious disturbances, neuralgic pains, local infection, or constitutional ill. So when your physician, finding no specific cause for your general ill health, orders that "impacted" wisdom removed, you will better understand the reason.

But don't worry should the wisdom teeth not erupt—the chances are that you have been spared trouble.

### Chief Buffalo Child Long Lance

Talented Western Canadian Is Author Of New Book, Called "Long Lance"

A man of magnificent appearance came to the office of Cosmopolitan Book Corporation last year and asked questions on the technique of writing a book. He was not seen around the Cosmopolitan offices, again for about a year. Then he returned with a complete manuscript, left it silently, and was gone again.

The next day the manuscript was circulating around the office, page by page, and being avidly read by half a dozen people at once.

The author was Buffalo Child Long Lance, a chief of the Blood Band of Blackfoot Indians. He had written how as a boy he suffered the tortures of training as a warrior and was educated in the teachings of medicine men and wrinkled old braves. He had told the stories of a babyhood on horseback, of buffalo-hunting, bloody fighting, awesome "medicine," of capturing wild horses, of war and peace, sun dances and happy feasts.

Now a college graduate and an appointee by President Wilson to West Point; a hero of the World War, and a most charming personality, Chief Long Lance turned up as a literary man of a high order.

The book was a rare contribution to Americana. The publishers prevailed on him to let the book be called "Long Lance."

Chief Buffalo Child Long Lance is a most extraordinary personality. More than thirty years ago he was born an ordinary Indian baby on the western plains in what is now Alberta. To tell of his boyhood before the Blackfoot Indians signed a treaty and went to the reservation would take the edge off his amazing book.

#### Had Some System

Hyde: "Your wife is very systematic, isn't she."

Parke: "Yes very. She works on the theory that you can find what ever you want when it wouldn't be if you did want it."

New York now has thirty planes turning out airplanes and accessories in the metropolitan area. There are reported to be 700 privately owned planes in the city.

Athletes—Keep Minard's Liniment handy.

### Little Helps For This Week

"The Lord thy God, He it is that doth go with thee; He will not fail thee, nor forsake thee."—Deut. xxxd. 6.

Yet if we will one Guide obey, The dearest path, the darkest way, Shall issue out in heavenly day; And we, on divers shores now cast, Shall meet, our perilous voyage past, All in our Father's house at last. —Richard Chenevix Trench.

So long as our existence lasts, we must not give up the duty of cheerfulness and hope. He who has guided us through the day, will guide us through the night also. The pillar of darkness often turns into a pillar of fire. Have patience and perseverance; believe that there is still a future before us, and we shall at last reach the haven where we would be. —Arthur Penrhyn Stanley.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

#### Room Was Too Small

An angler was describing to his friend a salmon he had caught. "How big was it?"

"Biggest salmon you ever saw," said the sportsman.

"But that doesn't explain much to me," argued his friend. "The only salmon I ever saw was in a can. Measure with your hands to give me an idea."

The angler glanced at the walls of the room.

"All right," he said, "but we'll have to go outdoors to do it."

Minard's Liniment For Every Pain.

First Separator Came in 1882 The first centrifugal cream separator was imported into Canada from Denmark in 1882.

Many a man of few words keeps them working overtime.

## Are You Ready

## When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner does baby feel soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler moods of colic, or constipation, or diarrhoea; effective, too, for older children. Twenty-five million bottles were bought last year.

W. N. U. 1703

## Your Hands Need Cuticura Soap

Every day to keep them soft and smooth. Bathe with either hot or cold water and always dry thoroughly. If chapped, red or rough use hot water and Cuticura Soap, rubbing in Cuticura Ointment after drying, especially at night.

Sample Each Free by Mail. Address Canadian Dept., Hutchinson, Ltd., Montreal, P.Q. Price, 25c. Ointment 50c. Cuticura Shaving Stick 25c.

## ALEXANDER GALBRAITH DEAD

Alexander Galbraith, internationally known horse breeder and importer, died at the home of his daughter in Edmonton, last month. Deceased was a familiar figure at live stock shows in Chicago, where he acted as judge for 33 years. Since 1915 he was superintendent of fairs in Alberta. His death will be a distinct loss to live stock interest both in Western Canada and the United States.

The tree planting division of the Forest Service, Department of the Interior, reports that there are now nearly 13,000 flourishing plantations scattered over the Canadian prairies where in former times one could travel for miles without seeing a tree. In addition to affording shelter for homesteads and crops preventing soil-drifting, these plantations have made it possible to establish orchards, vegetable gardens, and planting of bush fruits such as raspberries and currants, all of which were practically unknown on the prairies a few years ago.

The Medicine Hat city council has been informed by the Manitoba Rolling Mill company, Winnipeg, that plans are in course of preparation for the reconstruction of the mill located in Medicine Hat, including the installation of an open hearth furnace. The company is considering the use of electricity in preference to steam for the operation of the plant and is negotiating with the city for the amount of electrical power required.

The Canadian Government is formulating plans for establishing standard grades for honey. Exports of Canadian honey have increased 200 percent in four years, and now amount to over one and one-half million pounds annually.

Rector in-charge

## Here and There

(134)  
The oldest day for grain handling that the port of Montreal has experienced in its season was recorded on August 21st, when delivery went well over the 2,000,000 bushel mark for the 24 hours, and receipts were recorded at nearly 1,500,000 bushels, a total handling of 2,500,000 bushels for one day.

The almost complete absence of forest fires with their smoke screens marring scenic effects—the brilliant clearness of the air in this region has made the present tourist season the best on record in British Columbia. Many touring parties travelled over the Canadian Pacific lines, some brooking the journey to motor over the picturesque Banff-Windermere highway. Among other groups may be mentioned the Alpine Club of Canada, which held its camp at the lake of the Hanging Glacier, followed by the Trail Riders of the Canadian Rockies.

Approximately 250 new elevators have been constructed throughout Alberta this year. It is estimated by local grain men. The total capacity of these elevators would be about 18,000,000 bushels. It was stated. Complete fixtures for elevator construction in the province were not available, but grain men stated that extension of facilities had been progressing rapidly all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 110,000 bushels. The Alberta Wheat Pool alone has 110 grain elevator companies have in 1927 and practically all the public grain elevator companies have increased their storage capacity.

For the first season in a number of years the Nipigon trout may be said to abound. Hydro-development with accompanying fluctuations in water levels, threatened extinction of this exceptionally game fish, but the careful regulation of the past three seasons has apparently restored the world's most famous trout stream to something of its old standing. Six guests of the Nipigon Camp here brought in 125 pounds of fish yesterday, counting a fair number of four and five-pound trout caught weekly at the entrance to Lake Polly. Pike and pickerel still abound in large numbers, so it is thought that the restoration of the water level rather than the destruction of natural enemies has brought back the Nipigon trout.

Entirely new and important schemes involving large expenditures on the part of the Canadian Pacific Railway in the placement of British colonists upon the land, are to be undertaken through the Department of Colonization and Development of that country, working in co-operation with the Overseas Settlement Committee of the British Government. The details of these schemes have been negotiated during the present visit to Canada of Lord Lovat, Under Secretary of State for Dominion Affairs and chairman of the Overseas Settlement Committee. One undertaking provides for the building of one hundred cottages by the Canadian Pacific for the use of British families. They will be used to make families accustomed to Canadian conditions and farm life before being established on farms of their own.

## Rosicrucian Mysteries

All sincere seekers for the great truth and power known to the Ancients, write for the free book "Light of Egypt," mailed without obligation to occult students. Librarian, Amore Temple, San Jose, California. 6-19

Little Freda Milligan celebrated her fifth birthday on Tuesday, Sept. 18th. There were twenty guests present and they certainly enjoyed the party.

Mr. and Mrs. K. McNab and family who have been visiting here for the past two weeks returned to their home at Hamilton, Ont., on Wednesday.

Mr. and Mrs. Andrew Aitken arrived here Sunday morning from Vancouver. Their many friends are glad to see them around Chinook again.

Three men were arrested last Saturday night by the Liquor Dept. of Edmonton and fined \$20 and costs. The case was tried before J. C. Cuttrel, J. P. of Cereal.

Mr. and Mrs. Chas. Ray and daughter who formerly lived in Chinook and have been in Vancouver for the past two years visited at the home of Mrs. J. Massie on Monday. They are visiting for a month or so at Mrs. Ray's parents near Youngstown.
